

# ATLANTIC ATF DEXRON II

Semi Synthetic Automatic Transmission Fluid

## DESCRIPTION

ATLANTIC ATF DEXRON II is a semi synthetic lubricant based on carefully selected highly refined base oils with a very high viscosity index for most automatic transmissions. The improved fluidity at low temperatures ensures optimum performance in all conditions. Its exceptional frictional characteristics provide smooth switching and driving comfort.

## APPLICATIONS

ATLANTIC ATF DEXRON II can be used in automatic transmissions, torque convertors, power steering and hydraulic circuits, for which the manufacturers prescribe a product, which meets the General Motors ATF TYPE Dexron II -D requirements (use in GM automatic transmissions pre-1993).

## PERFORMANCE FEATURES AND BENEFITS

- Anti-wear protection: significantly extended transmission life.
- Extended oil life: excellent thermal and oxidation stability
- Increased clutch band and clutch pack capacity.
- Efficient operation of power steering units in all conditions.
- Enhanced friction durability for smooth transmission performance
- Improved protection of copper and bronze components
- Effective seal compatibility reduces the risk of leakages
