

ATLANTIC GEAR COMPOUND HEAVY

ATLANTIC GEAR COMPOUND HEAVY is a non-solvent containing grease for the lubrication of open gears and bearings. This premium quality grease is manufactured with a high quality Lithium Hydroxystearate soap and blended with very high viscosity paraffinic base stocks. ATLANTIC GEAR COMPOUND HEAVY grease contains extreme pressure, antioxidant, antirust, molybdenum disulfide and graphite additives, and is polymer-fortified.

APPLICATION

- Excellent fluidity and can be easily used in centralized systems.
- Specially designed for the lubrication of open gears and plain bearings such as used in the mining, construction and sugar mill industries.
- Excellent performance in crushers, pulverizers, rotating mills, kilns, and in other similar large equipment.

TYPICAL TECHNICAL PROPERTIES

Product code	12815G
Thickener Type	Lithium
NLGI Classification	0
Color, Visual	Dark Grey
Dropping Point °C, ASTM D 566	175
Worked Penetration @25°C 60 strokes, ASTM D 217	370

Note: These characteristics are typical of current production. While future production will conform to Atlantic's specification, variations in these characteristics may occur.

ATL/PDS/G/009/0*, 10.08.15, Page 1/1
* supersedes all previous versions

Packing : 200g | 250g | 400g | 500g | 1kg | 3kg | 15kg | 20kg | 45kg | 180kg

Health and Safety: This lubricant, when used in accordance with our recommendations and for the application for which it is intended, does not constitute any special hazard. A safety data file conforming to the requirements of current EC legislation is available from your local trade consultant.
