

# ATLANTIC X HYDRAULIC OIL HVI 100

High Viscosity Index Anti-Wear Hydraulic Oils

## DESCRIPTION

ATLANTIC HYDRAULIC OIL HVI ISO 100 is a high performance anti-wear hydraulic oil specifically designed to meet the needs of modern, high pressure, industrial and mobile equipment hydraulic systems. The shear stable, high viscosity index allows for a wide operating temperature range maintaining maximum hydraulic efficiency and component protection at both low and high temperatures.

## APPLICATIONS

ATLANTIC HYDRAULIC OIL HVI ISO 100 is recommended for all kind of hydraulic systems operating under high pressure (limit as indicated by the pump manufacturer) and high temperature. Especially suitable for hydraulic systems working under extreme temperature variations and equipment operating outside: easy start up at low temperature and regular operating in all seasons: civil engineering, machine tools, agriculture, marine, transport and other industrial applications.

## PROPERTIES

ATLANTIC HYDRAULIC HVI ISO 100 provides outstanding hydraulic system efficiency; ultra-keep-clean performance, and a high degree of fluid durability. The hydraulic efficiency feature can lead to reduced energy consumption for both industrial and mobile equipment, reducing operating costs and improving productivity. Their excellent oxidation and thermal stability can help to extend oil and filter change intervals while helping to ensure clean systems. Their high level of anti-wear properties and excellent film strength characteristics result in a high degree of equipment protection that not only results in fewer breakdowns but helps improve production capacity.

## PERFORMANCE FEATURES AND BENEFITS

- Very high viscosity index
- Excellent protection against rust and corrosion
- Good anti-foam and air release properties by using silicon free components
- Very low pour point
- Good demulsibility ensuring rapid water separation
- Remarkable filterability even in the presence of water
- High operating reliability
- Good shear stability
- Superior thermal stability avoiding the formation of sludge even at high temperature
- Very good oxidation stability ensuring a long service life of the fluid
- High protection against wear insuring maximum equipment life
- Excellent hydrolytic stability avoiding filter blocking
- Compatible with normal hydraulic sealing materials

## RECOMMENDATIONS / SPECIFICATIONS

AFNOR NF E 48-603 HV, AFNOR NF E 48-690, AFNOR NF E 48-691, DIN 51524 Part 3(HVLP), DIN 51524 Part 2 (HLP), ISO 11158 HM and HV, ISO 6743-4 HV, EATON VICKERS I-286-S, EATON VICKERS M-2950-S, DENISON HF-2, ASTM D6158 Type HM and HV

## TYPICAL TECHNICAL PROPERTIES

PRODUCTS CODE:	IL-08-HF-25016
ISO Viscosity Grade	100
Appearance, Visual	B&C
Density at 15°C, g/ml, ASTM D4052	0.886
Kinematic Viscosity at 40°C, mm²/s, ASTM D445	103
Kinematic Viscosity at 100°C, mm²/s, ASTM D445	15.2
Viscosity Index, ASTM D2270	155
Flash Point(COC), °C, ASTM D92	228
Pour Point, °C, ASTM D97	-36
TAN, mg KOH/g, ASTM D974	0.4

Note: These characteristics are typical of current production. While future production will conform to Atlantic's specification, variations in these characteristics may occur.
